

PROJECT FOCUS

To generate the underlying information and data to assist the LiveLikeLou Foundation in the creation of a collaborative network of ALS scientists, clinicians, and academic institutions that will in turn boost the ALS discovery pipeline.

KEY ACTIVITIES & DELIVERABLES

- Developed a spreadsheet for collecting key information for obtaining a comprehensive picture of North America-based ALS research*
- Populated the ALS research spreadsheet using publicly available information and LiveLikeLou's Scientific Research Committee's knowledge

*this was the initial step in building a database that eventually will serve as an important tool to increase collaboration and support building new networks within the ALS research community

Live Like Lou

The LiveLikeLou Foundation creates and connects communities to stimulate emerging ALS research and uniquely support families affected by Lou Gehrig's disease and our vision is to leave ALS better than we found it.
